

Cadence Design Systems

- Long history of test and manufacturing experience so our customers expect an optimized flow based on standards
 - There is confirmation of our position - yield learning requires the use of test results (2005 ITRS)
- Cadence is committed to standards and active participant in Accellera and IEEE standards committees
 - Leadership in driving standards (Recently - OCI)
- **Key enabler for volume diagnostics:**
 - Standard format enabling fast turnaround (seconds) of fail data capture
- **Value propositions:**
 - **Customer:** faster yield ramp with minimal impact on production
 - **ATE vendor:** support a single optimized interface
 - **EDA vendor:** improved volume diagnostics flow enabling more analysis
