

Data Logging Format for Volume Diagnostics

Focused discussion at SEMICON West 2007

You are cordially invited to the STDF data log format standardization meeting to be held on the 17th of July from 2:00-4:00 p.m., at the Courtyard by Marriott, San Francisco. This is a follow-on to the meeting that was held during ITC 2006, where member participation encouraged moving forward with this effort. Two separate working groups have been formed to address the scan and memory fail datalog respectively.

At the SEMICON West meeting we will present the status of activities in the working groups and our plans going forward. Your input and active participation is needed to ensure that the format meets the needs of a broad user base and can become true standard.

We look forward to your participation in establishing a standard that will help you improve time-to-yeild.

July 17, 2007
Courtyard by Marriott
San Francisco, California
